

## Canadian Multistakeholder Process: Enhancing IoT Security

Report on Sixth and Final Multistakeholder Meeting

**Location:** Ottawa, Ontario Canada

**Date:** April 18, 2019

**In-Person Attendance:** ~40

**Remote Attendance:** ~15

**Total Attendance:** ~55

**Livestream Link:** <https://livestream.com/internetsociety/iotsecurity2018-6>

### Overview:

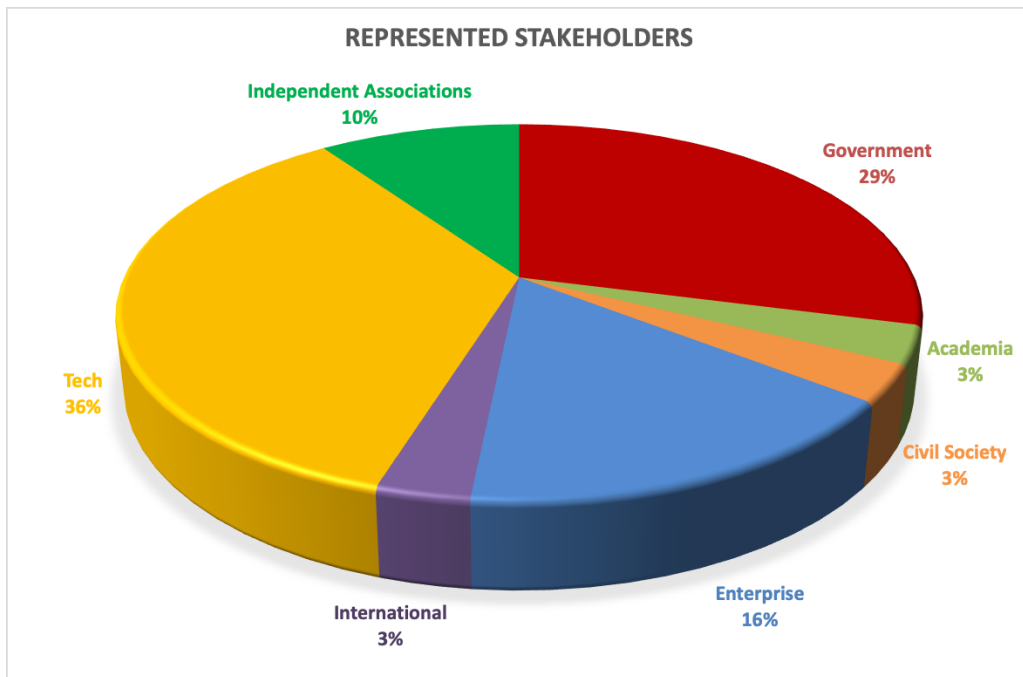

The Canadian Multistakeholder Process – Enhancing IoT Security is a year-long process to develop recommendations for a set of norms and/or policies to secure IoT in Canada. Events throughout 2018 and early 2019 will serve as an opportunity to begin planning and implementing a bottom up, organic process to remedy existing and potential security challenges in Canada’s national IoT ecosystem.

This initiative is a partnership between the Internet Society, Innovation, Science and Economic Development, the Canadian Internet Registration Authority, CANARIE, and CIPPIC. The Canadian Chapter of the Internet Society is also assisting in this effort.

The goal of the sixth multistakeholder meeting was to give an update on the work to date from each working group, finalize the recommendations of each working group and establish steps for implementation. At this meeting, an Implementation Working Group was also created and tasked with carrying out the next steps as defined by the full multistakeholder group.

This report details the meetings, the evolving research, and points of consensus arrived at by the multistakeholder group.

At this meeting, the following stakeholders were represented (by registration):

## Panel Updates and Group Discussion:

Consumer Education:
